

Oracle[®] Tutor[™]

Section 6 网格控制器 (Enterprise Manager Grid Control)

1. Install and Patch Enterprise Manager Grid Control software

OMS 不是从头装

2. Configure the Enterprise Manager repository

3. Create Enterprise Manager Grid Control users

4. Use Enterprise Manager to modify a database configuration

5. Configure Enterprise Manager to modify database availability

6. Create and manage jobs

7. Create and monitor alerts

8.Create notifications

9.Implement Grid Control and Database Control

10.Choose the appropriate tablespace type for the intended use

11.Create Scheduler jobs

12.Create schedules

13.Assign jobs to windows

窗口中的作业从 start_date 后的第一次 repeat_interval 时间到达后运行。也就是说开始时间为 10:00，间隔时间为 5 分钟，作业第一次运行是 10:05，这是它和计划的不同。

改变属性：

```
exec DBMS_SCHEDULER.disable('job_j');
```

```
exec DBMS_SCHEDULER.SET_ATTRIBUTE('job_j','stop_on_window_close',true);
```

```
exec DBMS_SCHEDULER.enable('job_j');
```

删除作业

```
exec DBMS_SCHEDULER.DROP_job('job_j',true);
```

```
exec DBMS_SCHEDULER.DROP_WINDOW('sys.job_w',true);
```

14.Create programs

15.Create job classes

16.Install the Enterprise Manager Grid Control infrastructure

17.Deploy Enterprise Manager Grid Control agents

18.Configure Grid Control for business requirements
